SAFETY AND SECURITY

Please find below tips and advice to keep you safe in case of fire or other emergency. Guests are encouraged to ask management if there are questions or concerns. We want our guests to have a wonderful, safe visit.

Plan Ahead

Check the exits. Review possible escape routes. **Walk down the corridor and find the fire exits.** Remember: never use the elevator in a fire. The call buttons may take you to a floor filled with flames or smoke. If you have any questions a member of the Bavarian Inn management team would be happy to assist you and guide you to the best exits.

Check Room

It is important to know the layout of your room because you may have to stay in it if the smoke in the corridor cuts off your escape. Staying in your room can help protect you from smoke and gases while awaiting rescue. **Put your room key close to where you sleep so you can find it easily.** You will need to regain entry to your room if smoke or fire blocks your exit.

Look Outside

Look out the window to see what's outside. Is escape possible? You may only be a few feet from the ground, and you can get out this way if the corridor is not usable. If you are on an upper floor, there may be a roof or deck within safe dropping distance. Dropping from more than two floors usually results in injury.

Carefully grab key, make haste slowly, keep low

If a fire begins in your room, report it to the Front Desk. Leave your room and close the door behind you to keep the smoke and the flames out of the corridor. If there is any evidence of smoke in your room when you wake up, roll out of your bed and crawl to the door. Don't stand! Smoke and deadly gases rise. **Feel the door with the palm of your hand.** If the doorknob is hot, don't open it. This means the fire is in the corridor. If the door is not hot, open it slowly and be ready to slam it shut if necessary.

Run water—wet towels

Wet towels and sheets. You'll need them to put around the doors and cracks if smoke seeps in. Use your ice bucket to bail water.

Fresh Air

Get fresh air. Make a tent over your head with a blanket at a slightly opened window to get fresh air. If the windows do not open you may have to break one with a chair or a drawer. Make sure there is no smoke or flames outside your window from the lower floor. If there is, do not open the window.

As a last resort!

If your room becomes untenable, you may be forced to leave through the best exit, but remember to keep low, and don't panic. **The gathering, regrouping point for the Bavarian Inn, in case of an emergency, is the slate patio in front of the Grey Stone Mansion.**
